

CGI Project Notification

Dear Partners,

Due to the impact of Java compatibility, Korenix introduces the CGI replacement program to provide more reliable and user friendly Web UI for the existing Korenix industrial managed switch models, ie: JetNet 5020G, JetNet 5428GV2 in 2017 Q4. Please note that this CGI web does not change the software functionality, but provide better user experience. We will be releasing the new CGI-based UI for the following models.

➤ CGI-Web List

Model Name	Description
JetNet 5310G	Industrial 8 PoE + 2G Combo Managed High Power IEEE802.3at PoE Switch
JetNet 6059G	Industrial 9-port Gigabit Managed Ethernet Switch

If you would like to know more, ex: upgrade procedure, please feel free to visit the following link.
